

From the Roots, We Blossom!

OUR PHILOSOPHY

Golden Roots International School follows a play-based learning program.

- We believe that each child has his/her own learning journey and can benefit greatly from exploring and leading their academic life
- Children from age 2-7 years are pivotal to children's ability to learn, create, trust, and develop a strong sense of self. Children learn through play and develop at their own pace.
- We provide a safe and stimulating environment for them to explore in our program facilities developmentally appropriate activities based on children's interests. We encourage a genuine regard for each child's achievements.
- We respect each child's culture and lifestyle. equality and inclusion are celebrated here at Golden Roots International and

different activities are included that expose children to different cultural experiences.

- With a Pearson based curriculum and teacher/student ratios, your child will gain an academic edge right from the start.

OUR CURRICULUM AND STAFF

- At Golden Roots, we combine international teaching philosophies such as Pearson, High Scope, and Montessori to create a rich learning environment.

We believe learning happens through three teachers:

- **Parents** – active partners in their child's education.
- **Classroom teachers** – guiding and engaging children in meaningful learning.
- **The environment** – thoughtfully designed spaces that inspire discovery.
- Our play-based, active learning approach encourages children to explore, question, and lead their own learning through hands-on experiences. Teachers provide emotional, physical, and intellectual support, ensuring a safe and stimulating environment

- **Our Staff** – with highly trained and experienced educators, Golden Roots delivers quality international education. We are inclusive, welcoming students with diverse needs, and fostering full participation in daily learning activities.

From the Roots, We Blossom!
